

FORGET THE TIE!

What Dad Really Wants for Father's Day is.....

Dad wants you to leave the thermostat alone!

For central HVAC systems in hot weather, a two-degree increase in the thermostat setting can result in cost savings of 5% or more.

Huntsville Utilities recommends an initial setting of 76 degrees. From that point, you can move the setting up or down until your comfort level is consistently maintained.

Help Dad save money on utilities while staying comfortable!
