

Fall is the perfect time to plant most trees and bulbs in North Alabama.....

But do you know where your *underground utilities* are located?

ALABAMA

Know what's below. **811** Call before you dig.

Disturbing underground utilities can have ***DIRE*** consequences!!!

Call **811** to have your utilities located before digging. **It's the law!!**

Would you recognize a natural gas leak?

Look for signs of a possible leak. A gas leak can cause bubbles in water on the ground, and turns grass/plants brown.

Listen for unusual noise. A whistling or hissing sound can indicate a leak.

Smell. Huntsville Utilities adds Mercaptan, which smells like rotten eggs, to odorless natural gas.

If you suspect a gas leak or other underground utility damage,
immediately call 911,
then call Huntsville Utilities at 256-53LIGHT.

For more information about your utilities visit
