

Regular Maintenance Improves Reliability

Residents who arrange for regular servicing of their heating and cooling equipment enjoy efficient system operation and are less likely to encounter unusually high energy costs. At minimum, Huntsville Utilities recommends servicing on an annual basis for systems more than four years old.

SERVICING SHOULD ALWAYS INCLUDE:

- 
- Cleaning of the evaporator and condenser coils**
 - A check of the duct system to insure proper support and insulation wrap**
 - A check of the duct system relative to significant air leakage**
 - A check to make sure that condensation is draining properly**
 - A check of refrigerant levels to insure efficient operation**
