

**Regular HVAC
system maintenance
improves efficiency**

Huntsville Utilities recommends regular servicing by a licensed HVAC contractor to ensure safe, efficient operation of your system. Servicing should include:

- ❖ Install clean filters.
- ❖ Oil fan motor and check drive belts.
- ❖ Clean rust and dirt from burners.
- ❖ Inspect vents to ensure they are properly connected.
- ❖ Inspect all air intakes and outlets to ensure they are open and unobstructed.

Ensure all carbon monoxide detectors are in proper working order.

Changing your HVAC air filter monthly improves energy efficiency.
